PROFESSIONAL SUMMARY

Data Analyst and Junior Data Scientist with hands-on experience in SQL, Power BI, and Python across real-world datasets covering humanitarian, sales, and public health domains. Built an interactive displacement forecast dashboard for Somalia using 8M+ records, delivered SQL business analysis on 9,994 transactions, and developed an ML image classifier for crop disease detection. Focused on translating data into actionable insights for both local and global contexts.

SKILLS

DATA & BI

SQL (MySQL, SQLite) · Power BI (DAX, Power Query) · Excel (Pivot, VLOOKUP, VBA)

Tools

Git · GitHub · Cursor · VS

Python

Pandas · Matplotlib · Seaborn · Streamlit · BeautifulSoup4 · OpenCV

Linux

Ubuntu, WSL

Frontend

React · Next.js · JavaScript · HTML/CSS · Node.js

PROJECTS

SOMALIA DISPLACEMENT FORECAST DASHBOARD · Power BI · DAX · Power Query | [View Project](#)

- Built an interactive Power BI dashboard analyzing 8.03M displaced people across 20+ Somali districts, breaking down causes into conflict (4.70M), drought (2.18M), and flood (1.14M).
- Designed forecast vs. actual comparison visuals with district-level slicers and multi-cause clustered bar charts, enabling month-by-month trend analysis.
- Dashboard covers real humanitarian data sourced from UNHCR/IDP datasets — applied to a live policy-relevant context rarely seen in analyst portfolios.

SQL BUSINESS DATA ANALYSIS - SAMPLE SUPERSTORE – SQL · MySQL · SQL lite | [View Project](#)

- Analyzed 9,994 transactional records across 4 regions and 3 product categories using GROUP BY, aggregations, and filtering to identify \$2.3M in total sales and \$286K profit.
- Discovered that discounts above 30% consistently produce negative average profit (avg loss of -\$45 to -\$310), surfacing a pricing anomaly worth business attention.
- Identified Tables and Bookcases as the top loss-making sub-categories (-\$17.7K and -\$3.5K respectively) and flagged 1,871 loss-making transactions for review.

COVID-19 Data Analysis & Insights Dashboard – Python · Pandas · Matplotlib · Streamlit | [View Project](#)

- Developed an interactive multi-country dashboard to monitor case, death, and recovery trends.
- Replicating Power BI-style reporting workflows using Python and Streamlit.
- Processed and cleaned a global public health dataset covering 180+ countries, applying time-series analysis to surface regional outbreak patterns.

Netflix Content & Viewership Data Analysis – Python · Pandas · Matplotlib · Streamlit | [View Project](#)

- Performed EDA on Netflix catalog dataset to uncover trends in genre distribution, release year patterns, and content mix (Movies vs. TV Shows) across 8,000+ titles.
- Produced 10+ visualizations including heatmaps, bar charts, and time-series plots summarizing content strategy shifts from 2010–2021.

Fall Armyworm Crop Disease Classifier - PyConAfrica Challenge – Python · OpenCV · ML | [TEAM PROJECT](#)

- Co-developed a binary image classification model to detect fall armyworm infestation in maize plants, targeting food insecurity for smallholder farmers across Africa.
- Designed under strict resource constraints for deployment in a mobile-based edge application — selected as part of the competitive PyConAfrica challenge

WORK EXPERIENCE

IT & Data Support -FLY GRAPHICS - Mogadishu

January 2025 – December 2025

- Cleaned and structured sales and operational data for internal reporting, supporting evidence-based decision-making across departments.
- Designed and maintained data reporting workflows, reducing manual effort in monthly reconciliation task

FREELANCE MERN STACK DEVELOPER (REMOTE) –

June 2024 - Present

- Built full-stack web applications using MongoDB, Express, React, and Node.js; collaborated with an AI engineer on system-based tools.
- Delivered frontend interfaces and backend API integrations for client projects across Somalia.

EDUCATION

Bachelor of computer science – Somali National University – Somalia

August 2021 - January 2026

Majors: Data Science, Machine Learning, AI

Relevant Course Work : Data Analysis, Databases, Programming Statistics.

CERTIFICATIONS

- Data Analysis with Python – [freeCodeCamp](#)
- Data Analyst Bootcamp – [Alex the Analyst](#)
- Google UX Design Certificate – **Coursera**
